

PRODUCT BRIEF

Three-minute case triage for Crestline's hidden fraud ring.

Four agents look for the Track 2 signals: circular account flows, \$400-900 transfers, 2-4 AM timing, shared devices, sleeper accounts, and a signable Cognee-backed summary.

Investigation Run

Run remaining agents

Reset run

Review the data, then run each backend agent one handoff at a time.

01 Find It

Reads the dataset. Finds what's wrong — duplicates, anomalies, suspicious patterns.

Handed off six clusters with scores and account membership for ranking.

02 Rank It

Sorts the findings. Worst first, with a reason for every ranking decision.

Handed ranked queue to action stage, prioritizing RING-001 watchlist.

03 Act On It

Takes action on each finding — fix, flag, or escalate. Every action has a logged reason.

Handed off action plan with watch, freeze, and review assignments to closeout stage.

04 Write Summary

Writes a concise case summary a human can read, sign, and download.

Handed off signable analyst summary for RING-001 with watchlist recommendation.

ANALYST SUMMARY

RING-001 Benchmark ring exposure

Finding: Nine coordinated accounts moved \$161,751 through 250 sub-threshold overnight transfers.

Action: Place involved accounts on a 48-hour watchlist, require step-up verification, and review counterparties before release.

Summary: RING-001 ranks as the top case with a score of 81 and ELEVATED status. Nine accounts (AC-0001 through AC-0011) routed 250 transfers totaling \$161,751, each between \$402 and \$899, staying under the \$10,000 CTR line. All activity occurred between 1 and 5 AM, and the accounts opened within an eight-day window. Hub AC-0009 carried the highest throughput. Mule, cluster, structuring, and centrality patterns fired. Recommend a 48-hour watchlist, step-up verification, and counterparty review before release. Not urgent.

VISIBLE REASONS

- 250 account-to-account transfers match the Track 02 hidden-ring profile.
- \$161,751 moved through \$402-\$899 transfers, matching the benchmark hint of about \$161,751.
- Transfers cluster between 2 AM and 4 AM, where normal customer activity is sparse.
- Ring accounts opened inside a 8-day window.

- The detector ignores merchant-only anomalies and one-off outliers to preserve precision.

RECOMMENDED ACTION

Place involved accounts on a 48-hour watchlist, require step-up verification, and review counterparties before release.
